

***Converge FiberX on Boost Mode: Gigabit Internet Speeds at the Lowest Price Ever***

**Manila, Philippines, October 23, 2024:** On the heels of the recently announced collaboration between Converge ICT Solutions Inc. and Netflix, Converge continues to build on its culture of service by making Boost Mode a permanent offering now accessible to all.

Boost Mode was initially launched to celebrate our back-to-back Ookla® Speedtest Awards for 2023 Q3-Q4 and 2024 Q1-Q2. This limited-time offer provided a free automatic speed boost of an additional 100 Mbps for all FiberX plans. Boost Mode permanency introduces Wi-Fi 6 capabilities to FiberX plans starting from P1,699 and is the latest of Converge’s efforts to provide a better and more reliable internet experience.

**The Gigabit Life**

Gigabit life has never been this accessible, starting with FiberX Plan 3500, the first accessible gigabit fixed broadband plan in the Philippines. New subscribers can enjoy speeds up to 1 Gbps powered by the fastest, most reliable internet and XCLSV (VIP) benefits for only P3,500/month, down by more than half from P7,499.

For a more value option, Time of Day 3000 Plan offers high speeds during key hours for gaming, streaming, and working, while still providing solid performance during off-peak times. As it stands, it is one of the most unique and flexible fiber internet plans with the top-end feature (P3,000/month) providing users with up to 700 Mbps that spikes up to 1 Gbps during your chosen peak hours, whether at night or during the day.

## **PRESS RELEASE**

Deploying gigabit plans accessible to the greater public is the culmination of Converge’s vision of a connected future. Giving precedence to network scalability and sustainability from day one has helped Converge establish **technical superiority**. This has allowed Converge to provide tailor-fit offerings particularly recognizing gamers as an essential part of a rapidly evolving market and a driving force in shaping the future of the “digital life”.

For these passionate gamers, gaming transcends mere leisure; it embodies a lifestyle. Gamers are both explorers and creators of new worlds, a sentiment highly valued within the organization.

Shown in Converge’s partnership with top-level Esports teams like two-time world champions Falcons AP. Bren and MPL PH Season 14 Champions Fnatic Onic, the end-goal is to not only enhance the experience but also provide the means to dominate the competition. This goal extends to providing these same elite resources to Converge subscribers through The Game Changer Elite Bootcamp Plan. It is Converge’s answer to every gamer’s plight: low-ping, low-jitter and starting at only P5,000, this is the only internet plan specifically catering to competitive Esports teams. Whether it’s intense firefights or strategic plays, the squad gets unmatched connectivity and network prioritization for gaming apps, ensuring games stay responsive when the pressure’s on. With Up to 1 Gbps speeds backed by the ASUS ROG Rapture GT-AX 6000 gaming router, the whole team stays in the zone, fully connected, and ready to dominate—even with heavy traffic across multiple devices.

### **Culture of Service**

Orange Ramirez, VP & Head of Marketing states, “Through Boost Mode, we at Converge reaffirm our commitment to serving the unserved and underserved. Beyond the clear benefits regarding value and performance, subscribers can expect to join an unrelenting effort to cultivate a culture of service, as demonstrated by our track record of delivering accessible, reliable, and tailor-fit connectivity to all Filipinos.”

“At Converge, our vision has always centered on giving amazing digital experiences.” Converge EVP & Chief Commercial Officer Benjamin B. Azada adds, “We want to not only continue providing customers with substantial speed increases but also reiterate our commitment to championing sustainability. By equipping subscribers with network devices that feature intelligent hibernation mechanisms, we can help save up to 41% in power consumption. Boost Mode is only the most recent step in Converge’s vision of bridging the gap with the best in the world.”

Converge ICT Solutions Inc. is once again elevating connectivity in the country with the launch of Boost Mode permanency. By extending this gift—initially only available to existing subscribers—to everyone, the company aims to demonstrate that connectivity is not a luxury, it is a basic need that should be accessible to all, empowering every home’s digital life.
